

A Life Saved

Never give up. No matter how ill you are, Ayer's Sarsaparilla has cured some terrible cases, and it will cure you.

Mr. Thos. H. Cashel, R. R. Creek, Dripstone, New South Wales, writes:

"I feel it my duty to let suffering people know what a wonderful blood-purifying medicine is Ayer's Sarsaparilla. My illness began with sharp pains in the limbs, while I was handling wet wool. After a day or two I could not walk, and suffered terrible pains. My face turned nearly black, large red blotches came out all over my body, and then I became delirious. I was in two hospitals for some time, and everything was tried, but I grew weaker and weaker, and became convinced that nothing could be done for me. I had heard so much about Ayer's Sarsaparilla that I thought I would give it a trial as the last hope. After taking one bottle I thought I felt a little better. So I procured another bottle, and then another, and still another. I gradually improved, and in due time left my bed for the first time in six months. I am now in good health, and I say to every one that Ayer's Sarsaparilla saved my life."

AYER'S Sarsaparilla

There are many imitation Sarsaparillas. Be sure you get "Ayer's."

INCUBATOR BABY THRIVES AT THE MATERNITY HOME

An interesting experiment with a wee mite of girl-babyhood is being carried on at the Kapiolani Maternity Home. In the incubator, which was the gift of Miss Alice Campbell about a year and a half ago, there is a babe of Hawaiian descent—a six-months' bit of humanity—which came into this world on December 23. It was immediately placed in the incubator, and has remained there ever since.

It is now over two months since the little one began its effort, by mechanical means, to live, and it is thriving. For six weeks it did not gain much over the two and a quarter pounds weight recorded at its birth. In the past two weeks, however, it has gained two pounds.

Miss Dutot, the matron of the Home, is personally watching the development of the experiment, and feels proud of her success thus far. The baby has never had a sick day, and when awake its eyes rove about from person to person and a broad smile almost eclipses its features. In another three weeks the infant may be taken from the incubator and begin life as other babies do.

This is the second baby to be reared in the incubator. The first one experimented with was successfully reared and lived for some time, until the mother took a trip to Molokai. She unwise took the infant along and it died shortly afterward.

The incubator is one of the Kny-Scheerer & Company's patents, and was the best Miss Campbell could procure.

LIEUT. LOVING TO START A CONSERVATORY OF MUSIC

Lieut. Loving, the able leader of the famous Philippine Constabulary Band, which gave a concert on the Roof Garden of the Alexander Young Hotel, while passing through Honolulu, plans to open a conservatory of music in Manila for the benefit of Filipinos. The Manila Times says of the project:

A conservatory of music is one of the possibilities for Manila in the near future. The plan is one suggested by Lieutenant Loving, of the constabulary band, who hopes to get an opportunity before very long to put it in operation. From his work with the Filipino musicians in the constabulary band and the progress made by these pupils of his, Lieutenant Loving is convinced that there is musical ability in the Filipinos that deserves to be developed.

Some of the musicians when he assumed their tutelage were possessed of the crudest education in musical matters. During their stay at St. Louis, however, they were listened to with evident admiration by the members of the German band and the band of the Garde Republicaine. The French band had eleven clarinets, which sounded like one instrument, so perfect was the instrumentation. Lieutenant Loving is confident that his pupils can equal the work of their French comrades at the exposition.

The fundamental work of the conservatory, as Lieutenant Loving has it in prospect, is to teach the violin, the piano, the rudiments of harmony and all the instruments used in a military band, as well, from the beginning of the course. A faculty of six would be needed, he thinks, to carry out this curriculum.

Lieutenant Loving has hopes that for the sake of affording the best Filipino musicians the advantage of such a school, the government would be willing to support such an institution. If not, he believes that it will be possible to get private enterprise to do it. The performance of Pedro Paterno's "Dreamed Alliance" some time ago furnished the sum of P1000.00 which Senor Paterno wanted devoted to a similar cause, and which has lain untouched ever since, awaiting the day when the conservatory should become a possibility.

If the plan meets with official approval it is possible that Lieutenant Loving will spend a short time in Germany studying the administrative problems incident to conducting such an institution.

HALEIWA.

The Haleiwa Hotel, Honolulu's famous country resort, on the line of the Oahu Railway, contains every modern improvement and affords its guests an opportunity to enjoy all amusements—golf, tennis, billiards, fresh and salt water bathing, shooting, fishing, riding and driving. Tickets, including railway fare and one full day's room and board, are sold at the Honolulu station and Trent & Company for \$5.00. For departure of trains consult time table.

On Sundays, the Haleiwa Limited, a

two-hour train, leaves at 8:22 a. m.; returning, arrives in Honolulu at 10:10 p. m.

An Australian Singer.

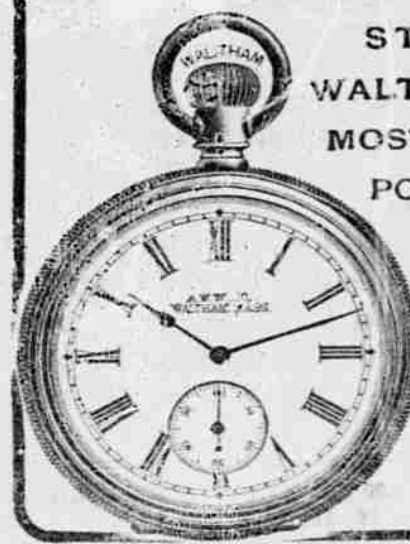

Miss Florence Young, who passed through yesterday on the Sierra, en route from Australia to New York, is one of the sprightliest of the Australian-born comic opera singers. She has been a pupil of Marchesi and achieved success on the English stage. It is said she was recently singing in Australia for \$250 per week.

FOREIGN VESSELS TO COAL THE UNITED STATES NAVY

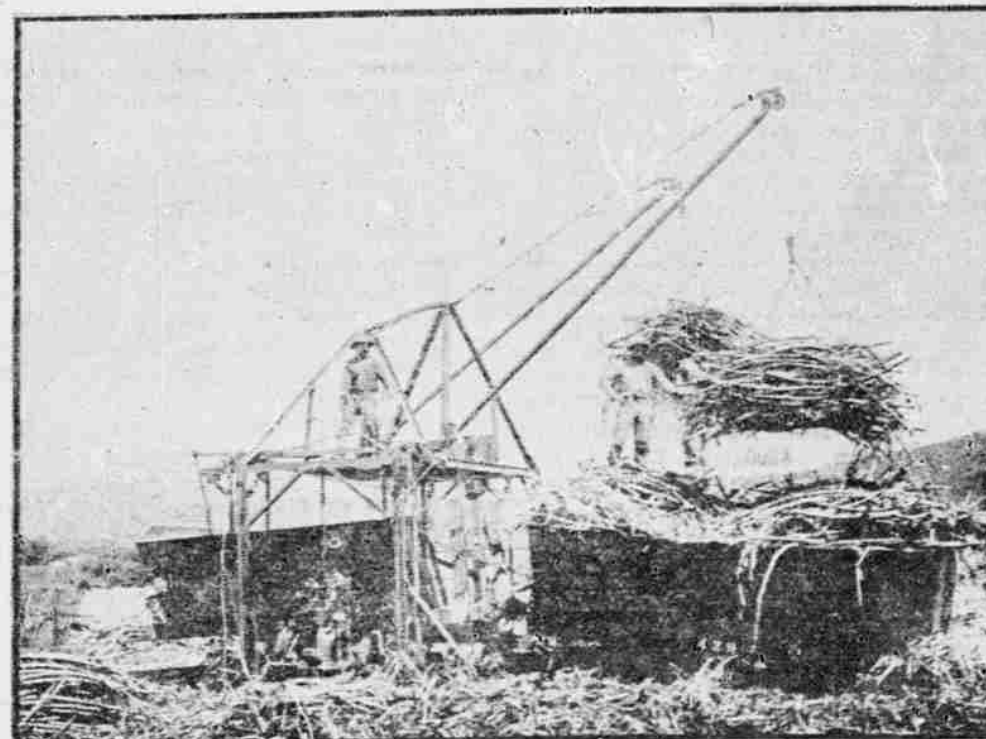

WASHINGTON, Feb. 11.—Secretary of the Navy Morton has authorized Rear Admiral Henry N. Manney, Chief of the Bureau of Equipment, to contract with the owners of foreign steamers for the shipment of 60,000 tons of coal to Manila for the use of the Asiatic fleet. Since last September Admiral Manney has been endeavoring to secure enough American ships to transport sufficient coal for the use of the ships on the Asiatic station, but he succeeded in getting only 28,600 tons shipped in steamers and 10,000 tons in American sailing vessels. This will not begin to supply the demand. Admiral Manney finally wrote a third communication to the Secretary requesting him to bring the matter to the attention of the President, who in his discretion is empowered by law to authorize the chartering of foreign steamers. The bureau will have difficulty in securing foreign bottoms at \$4.50 per ton, where it had to pay \$8.50 per ton for American bottoms and has even at this rate exhausted the supply of American steamers. The situation on the Asiatic station, as far as the supply of coal is concerned, has been exceedingly dangerous for some time.

The confidence that the tenants of the sky-scrapers of New York have in their fire-proof qualities was demonstrated recently during a fire in the Park Row Building. While the firemen were battling with the blaze the office occupants calmly attended to their regular business. The fire was kept confined to one room.
